EverCommerce Hiring Team

Bold Group Division

Denver, CO

Dear EverCommerce Hiring Team,

I am writing to express my strong interest in the Manager, Customer Success position for your Bold Group division. With over 15 years of experience operating at the intersection of technical systems management, enterprise accounts, and cross-functional leadership, I am highly eager to bring my background to a company leading the digital transformation of the service economy. Being based locally in the Denver metro area, I am also uniquely positioned to seamlessly collaborate with your corporate headquarters and travel across North America as required to support our strategic accounts.

The player-coach description of this role resonates deeply with my most recent experience as Regional Support Manager at Hansen Technologies. In that capacity, I directly led and developed a distributed, remote engineering and support team across five countries while simultaneously serving as the high-touch executive sponsor for a \$20M+ enterprise SaaS ecosystem. I am intimately familiar with the balance needed to coach a team toward hitting strategic KPIs while personally rolling up my sleeves to navigate complex client escalations, optimize onboarding paths, and secure long-term Gross and Net Revenue Retention (GRR/NRR).

Throughout my career, I have thrived by turning ambiguous operational challenges into scalable, structured playbooks. I regularly leverage technical platforms to maximize team production—such as building automated Power BI telemetry dashboards and engineering custom enterprise Jira workflows—ensuring that real-time customer health metrics translate directly into actionable roadmap inputs for Product Management. Having worked across both major global enterprises and fast-paced startups, I pride myself on an adaptable, low-ego communication style that builds immediate trust across product, sales, support, and corporate leadership teams.

I am incredibly excited about the opportunity to drive long-term customer value for Bold Group's premier security and alarm software portfolio. To view a functional demonstration of my operational grit and execution, I welcome you to interact with the live AI Career Insight Agent proxy linked in the portfolio section of my application. Thank you for your time, consideration, and dedication to building a high-performance, customer-centric culture.

Sincerely,

Matthew Lorensen
