TECHNICAL ARSENAL

Program Governance
Agile, SDLC Management, Cross-Functional Leadership, Scope Controls.

Ops & Infrastructure
Sev-1 Incident Triage, Cloud Resiliency, SLA & RACI Frameworks.

Technical Mastery
Python, Power BI Telemetry, Jira Enterprise, Generative AI (RAG), AWS.

CERTIFICATIONS

- Anthropic AI Fluency: Framework & Foundations
- Anthropic AI Fluency: AI Capabilities & Limitations
- Introduction to Generative AI: Art of the Possible (AWS)

EDUCATION

AAS in Computer Information Systems
Programming Focus
Arapahoe Community College

Undergraduate Coursework
Focus: Business Intelligence & Data Systems

PROFESSIONAL SUMMARY

Technical Program Manager and IT Operations Leader with 15 years of experience bridging the gap between high-level strategy and technical execution. Proven track record of driving operational efficiency, architecting data pipelines, and leading cross-functional matrixed teams. Specializes in Sev-1 incident triage, cloud infrastructure optimization, and translating complex technical realities into clear executive strategy.

PROFESSIONAL EXPERIENCE

- Regional Support Manager | Hansen Technologies** Dec 2021 – June 2026
- **Distributed Group Leadership:** Managed a fully remote organization of 5 to 20 technical assets distributed across up to 5 countries, aligning Solutions Architects and Site Reliability Engineers to maximize global portfolio stability.
 - **Data Pipeline Automation:** Eliminated 60 hours of manual labor per month by architecting an automated Jira-to-PowerBI tracking bridge to serve as a single source of truth for dynamic SLA parameters.
 - **Reporting Efficiencies:** Cut global reporting labor by 30% weekly through structural template standardization, consistently surpassing annual executive gross revenue KPIs and securing clean audit clearances.

- Manager of IT Operations & Program Manager | LB Technologies** May 2020 – July 2021
- **SDLC Optimization:** Accelerated time-to-market application delivery speed by 40% through a ground-up workflow redesign of internal Jira pipeline delivery states and strict implementation of Agile milestones.
 - **Product Rollout Architecture:** Steered the multi-disciplinary lifecycle rollout of the firm's initial native mobile application, yielding an immediate 10% surge in top-line digital segment revenue.

- Product Developer | Viasat** July 2013 – April 2020
- **Broadband Launch Architecture:** Developed core product architectures enabling the Viasat 2 residential rollout, driving a 15% YoY surge in ARPU to \$81.99 and sustaining segment revenues down to 577,000 subscribers.
 - **Anomaly Mitigation & Risk Strategy:** Engineered product-level technical adjustments and critical log tracking in response to a 15% post-launch capacity anomaly, ensuring product stability under constrained parameters.
 - **Satellite Network Integration:** Architected core internal ground applications to connect Viasat's terrestrial network fabric with the SGDC-1 satellite, enabling seamless service activation workflows across Brazil.

TECHNICAL PROJECTS

- Interactive AI Career Insight Agent**
- Architected a production-ready RAG agent using Python, Streamlit, LangChain, Chroma DB, and Google Gemini. Integrated Google Sheets API for silent telemetry tracking and enforced strict temperature controls (0.1) to completely eliminate hallucinations. **Live application access available upon request.**
