PROFESSIONAL SUMMARY

Enterprise Customer Success Leader and IT Operations Manager with 15 years of experience bridging the gap between complex software ecosystems and corporate client execution. Proven track record acting as a player-coach to direct remote, cross-border teams while personally managing high-value, strategic enterprise accounts. Expert at driving SaaS platform adoption, optimizing Gross/Net Revenue Retention (GRR/NRR), resolving complex technical escalations, and translating client telemetry into actionable product roadmaps.

CORE COMPETENCIES

Customer Success Governance: Player-Coach Leadership, Enterprise Account Management, Executive Business Reviews (EBRs/QBRs), Onboarding Optimization, Churn Mitigation.

Operations & Retention: Gross/Net Revenue Retention (GRR/NRR), Technical Escalation Management, SLA/KPI Architecture, Customer Health Tracking.

Technical & Platform Systems: Power BI Telemetry, Jira Enterprise Workflows, SharePoint (Design/Deployment), Opsgenie, Oracle, Microsoft Office Suite (including Copilot).

PROFESSIONAL EXPERIENCE

Regional Support Manager | Hansen Technologies

April 2022 – June 2026

- **Player-Coach & Account Leadership:** Directed a remote, cross-border team of 5 to 20 technical assets across 5 countries while serving as the strategic escalation point for a \$20M+ enterprise SaaS ecosystem spanning 125+ high-value corporate client accounts.
- **Operational Telemetry & Insights:** Designed and deployed centralized Power BI reporting suites and telemetry frameworks to monitor system health, verify SLA parameters, and provide corporate leadership with data-informed retention insights.
- **Enterprise Platform Governance:** Served as Global Jira Administrator, engineering custom technical workflows, conditional permission criteria, and access controls to eliminate operational friction and enhance team productivity.
- **Collaboration & Efficiency:** Maintained cross-functional alignment across global business units utilizing SharePoint (page design/deployment), Confluence, Microsoft Teams, Slack, and WhatsApp to optimize internal communication and support structures.
- **Process Optimization:** Standardized tracking templates to slash departmental reporting overhead by 30% weekly, enabling the customer-facing organization to consistently surpass gross revenue KPIs.

Service Delivery Manager | Hansen Technologies

December 2021 – April 2022

- **Escalation & Crisis Management:** Commanded live technical crisis mitigation and incident triage environments for multi-tenant enterprise productions, programming Opsgenie alert-routing layers and strict resolver escalation trees to protect client health.
- **Cross-Functional Alignment:** Partnered closely with corporate Sales, Implementation Engineering, and Product Management to author repeatable, simplified client onboarding guardrules that eliminated post-sale friction.
- **Runbook Engineering:** Isolated structural workflow vulnerabilities and developed centralized, automated troubleshooting runbooks that significantly reduced initial customer touchpoint resolution delays.

Business Analyst IV - Video | Spectrum Communications

July 2021 – December 2021

- **Telemetry Data Aggregation:** Analyzed high-volume platform microservice streams and system logs, transforming raw machine metrics into actionable business intelligence summaries for director-level capacity expansion planning.
- **Resource Mapping Optimization:** Formulated predictive resource modeling frameworks to optimize engineering dispatch alignment, driving down capacity constraints across primary service distribution network assets.

Manager of IT Operations & Program Manager | *LB Technologies*

May 2020 – July 2021

- **Greenfield Framework Bootstrapping:** Engineered the enterprise's foundational IT operational helpdesk and server support framework from the ground up, implementing the organization's first real-time customer satisfaction and SLA tracking dashboards.
- **SDLC & Delivery Optimization:** Accelerated time-to-market application delivery cycles by 40% through a total layout redesign of internal Jira delivery states and rigid enforcement of predictive Agile milestone parameters.
- **Product Rollout Execution:** Steered the multi-disciplinary development lifecycle and successful production rollout of the organization's initial native mobile application, yielding an immediate 10% surge in digital segment revenues.

Product Manager & Lead Catalog Developer | *Viasat*

November 2013 – April 2020

- **Strategic Platform Rollout:** Developed core product application architectures to facilitate the commercial deployment of next-generation residential broadband platforms, achieving a 15% year-over-year ARPU increase.
- **Adoption & Anomaly Mitigation:** Managed the product response to a critical 15% post-launch technical capacity anomaly, spearheading the necessary technical adjustments and data tracking to stabilize the product offerings and protect client retention.
- **International Network Integration:** Architected internal applications to securely connect terrestrial network fabrics with the SGDC-1 satellite, successfully opening cloud-based service activation workflows across international markets.

TECHNICAL PROJECTS

Interactive AI Career Insight Agent

- Architected and deployed a production-ready RAG (Retrieval-Augmented Generation) autonomous agent framework using Python, Streamlit, LangChain, and Chroma DB.
- Integrated automated backend telemetry tracking and enforced tight system prompt guardrails to ensure zero agent hallucinations and a frictionless, data-secure user experience.
- *Live application access link provided in the Website / Portfolio section of this application.*

EDUCATION & CERTIFICATIONS

Professional Certifications

- Anthropic AI Fluency: Framework & Foundations (July 2026)
- Anthropic AI Fluency: AI Capabilities & Limitations (July 2026)
- Introduction to Generative AI: Art of the Possible (AWS)

Academic Background

- **AAS in Computer Information Systems** – Software Development Languages & Programming (Arapahoe Community College)
- Undergraduate coursework completed toward a Bachelor's Degree with a specialized focus in Business Intelligence & Analytical Data Systems
